BACKGROUND / DISCUSSION:

Discussion of the what, why, where, when, and how to enable Council to have reasonably complete description of the contemplated action.

The City is following the State Implementation Plan (SIP) requiring El Paso to reduce its contribution to the particulate matter component of El Paso's Air Shed Quality associated with the City's unpaved roadway surfaces. El Paso's roadway network consists of 2,200 miles of paved City streets. The current inventory of identified unpaved rights-of-way includes approximately eleven (11) miles of unpaved streets, and sixty (60) miles of unpaved alleys. There also exists numerous "paper" platted streets within the City. This represents an improvement over the original 22 miles of unpaved rights-of-way identified in 1996 when the program was originally initiated. Attached to the resolution is the list of proposed improvements to unpaved rights-of-way within District 8. This prioritized list has been developed to utilize funding authorized by the voters in the 2004 bond election.
